Buy services by the block.

Pay less when you buy in bulk.

No one likes surprises in accounting, especially when it comes to what you had planned for in your budget.

Lassen PC offers bulk rates on block purchases of hours. Buy 25 hours of labor and save 10%.

How much real time does that cover? We've found most businesses that purchase the 25-hour blocks still have a little left over at the end of the year – and that is including the time to keep all of the hardware up to date / performing general maintenance.

What if you do have some left over? Don't worry - you do not lose them!

Add backups and sleep better.

Lassen PC lets you schedule backups to run daily, weekly, or monthly—it's your choice. Our cloud backup service offers automatic backup protection with the option to schedule your backups continuously throughout the day. Our service is an affordable backup that saves you time and money (and headaches) so you can focus on other important things, like growing your business.

Studies show that losing critical files for even 24 hours can seriously harm most businesses. And it's about more than just losing money. It's about your reputation. Are your servers protected? Lassen PC server cloud backup has you covered. Lassen PC protects Windows and Mac servers in addition to all of your computers for complete data protection for your business.
